Contents of Volume 33

Number 1, October 10, 1968

MOROSON AND A. ANELLO. Attempts to Link the Interruptions in T5 Bacteriophage DNA with an Enzyme from *E. Coli* 1

DEAKI YAMADA. Crystallization and Properties of β-Tyrosinase from *Escherichia intermedia* 10

S. BAGNARA AND L. R. FINCH. Ribonucleoside Triphosphate Accumulation on Amino Acid Starvation of "Stringent" *Escherichia coli* 15

C. HUGHES AND P. J. TANNER. The Action of Dilute Alkali on Some Bacterial Cell Walls 22

K. STEINRAUF, MARY PINKERTON, AND J. W. CHAMBERLIN. The Structure of Nigericin 29

ALTER SAUERBIER AND MONICA HIRSCH-KAUFFMANN. Transfer of Ultraviolet Light Induced Thymine Dimer from Parental to Progeny DNA in Bacteriophage T1 and T4 32

ASATERU SHIN AND ANTHONY SAN PIETRO. Complex Formation of Ferredoxin-NADP Reductase with Ferredoxin and with NADP 38

ASH P. MYER AND TSOO E. KING. Effects of the Oxidation State, Ligands, Detergents and Aging on the Conformation of Cytochrome Oxidase 43

. D. ENGERS AND N. B. MADSEN. The Effect of Anions on the Activity of Phosphorylase *b* 49

[. TAKAGI AND K. OGATA. Direct Evidence for Albumin Biosynthesis by Membrane Bound Polysomes in Rat Liver 55

[ICHEL HORISBERGER AND HAROLD AMOS. Glutamine Synthetase: Failure of Induction by Hydrocortisone at 27°C 61

AROSLAV ZEMLA. Effect of 5-Fluorouracil and 5-Bromo-2′-Deoxyuridine on the Induction of Thymidine Kinase in Polyoma Virus-Infected Mouse Embryo Cells 69

. P. MELL, M. MARTELLI, J. KIRCHNER, AND F. M. HUENNEKENS. Multiple Forms of Dihydrofolate Reductase 74

OLIN K. FRANKER AND PATRICIA A. RIEBECK. Biochemistry of Friend Virus-Infected Cells I. Virion-Specific RNA 80

. A. L. DAVIES, J. COLOMBANI, D. C. VIZA, AND J. DAUSSET. Human HL-A Transplantation Antigens: Separation of Molecules Carrying Different Immunological Specificities Determined by a Single Genotype 88

. VOGEL, A. ZAMIR AND D. ELSON. The Specific Resistance of N-Substituted Initiator Methionyl-tRNA to Enzymatic Hydrolysis 94

. BINKLEY AND NEVA L. KING. Disaccharidase Activity of Renal Tissue 99

. J. VARGHESE AND SHIH Y. WANG. Photoreversible Photoproduct of Thymine 102

OSHIHIRO SOKAWA, EIKO NAKAO, AND YOSHITO KAZIRO. On the Nature of the Control by RC Gene in *E. Coli*: Amino Acid-Dependent Control of Lipid Synthesis 108

RED H. WILT. Heme and Regulation of Embryonic Hemoglobin Synthesis 113

DEL A. YUNIS AND GRACE K. ARIMURA. Isoenzymes of Glyocogen Phosphorylase in Human Leukocytes and Platelets: Relation to Muscle Phosphorylase 119

OWARD L. ELFORD. Effect of Hydroxyurea on Ribonucleotide Reductase 129

OLAND MERTELSMANN AND HEINRICH MATTHAEI. Isolation and Purification of DNA-Dependent RNA Polymerase from Nuclei of Human Placenta (Nucleoside Triphosphate: Ribonucleic Acid Nucleotidyl Transferase, EC2.7.7.6.) 136

. HOLMAN, J. S. LOWE, J. S. MORLEY, AND M. J. SMITHERS. The Substrate Specificity of Guinea-Pig Plasma Kallikrein 140

. C. W. EVANS. Ferredoxin Dependent Synthesis of α-Ketoglutarate and Pyruvate by Extracts of the Green Photosynthetic Bacterium *Chloropseudomonas ethylicum* 146

. E. HILL, G. P. ROSSETTI, AND K. E. VAN HOLDE. A Ribonuclease-Labile "Tail" on the 50S Ribosomes from *Escherichia coli* 151

AX SCHLAMOWITZ AND RALPH TRUJILLO. A New Solubilizing Group for Synthetic Pepsin Substrates 156

RUNO A. MELANDRI, ASSUNTA BACCARINI, AND PAOLO PUPILLO. Glyceraldehyde-3-Phosphate Dehydrogenase in Photosynthetic Tissues: Kinetic Evidence for Competitivity between NADP and NAD 160

NORMAN A. CUMMINGS. Decreased Tyrosine/Tryptophan Ration in a 6.6S Cryoglobulin, as Determined by a Spectrophotometric Technique 16

YUZURU AKAMATSU AND JOHN H. LAW. Enzymatic Synthesis of 10-Methylene Stearic Acid and Tuberclostearic Acid 17

JERRY A. SCHNEIDER, SAMUEL RAEBURN, AND ELIZABETH S. MAXWELL. Translocase Activity in the Aminoacyl Transferase II Faction from Rat Liver 17

Number 2, October 24, 1968

J. CHRISTOPHER CORDARO, H. RICHARD LEVY, AND ELIAS BALBINDER. Product Inhibition of Anthranilate Synthetase in *Salmonella typhimurium* 18

A. RONEN. Inactivation of Phage T4 by Ethylemethane Sulfonate 19

HYOGO SINOHARA. Effect of *o*-Phenanthroline on the Induction of Glucose Dehydrogenase in *Aspergillus oryzae* 19

C. MAYUGA, D. MEIER, AND T. WANG. *Escherichia coli:* the K12 Ribosomal Protein and the Streptomycin Region of the Chromosome 20

H. TI TIEN, WILLIAM A. HUEMOELLER, AND HIE PING TING. Formation of Black Lipid Membranes (BLM) from Extracts of Spinach Leaves 20

R. K. RALPH. A Suggestion on the Origin of the Genetic Code 21

P. A. MILLER, P. W. TROWN, W. FULMOR, G. O. MORTON, AND J. KARLINER. An Epidithiapiperazinedione Antiviral Agent from *Aspergillus terreus* 21

J. A. PETRUSKA AND L. B. SANDBERG. The Amino Acid Composition of Elastin in its Soluble and Insoluble State 22

PETER H. HOMANN. Effects of Manganese on the Fluorescence of Chloroplasts 22

PEDRO CUATRECASAS AND MEIR WILCHEK. Single-Step Purification of Avidin from Egg White by Affinity Chromatography on Biocytin-Sepharose Columns 23

H. I. ROBINS AND I. D. RAACKE. A Simplified Procedure for the Simultaneous Isolation of 4S and 5S RNA 24

E. CUNDLIFFE. Polyribosomes and Ribosomal Sub-Units of Bacterial Protoplasts 24

VAUGHN JACKSON, JOANNE EARNHARDT, AND ROGER CHALKLEY. A DNA-Lipid Protein Containing Material Isolated from Calf Thymus Nuclear Chromatin 25

R. THIEBE AND H. G. ZACHAU. The Role of the Anticodon Region in Homologous and Heterologous Charging of $tRNA^{Phe}$ 26

C. M. CALDARERA, M. S. MORUZZI, B. BARBIROLI, AND G. MORUZZI. Spermine and Spermidine of the Prostate Gland of Orchiectomized Rats and Their Effect on RNA Polymerase Activity 26

B. H. WEBER AND J. KRAUT. Isolation and Partial Characterization of Iodinated Chymotrypsinogens.. 27

B. H. WEBER AND J. KRAUT. Identification of the Most Rapidly Iodinating Tyrosine in Subtilisin BPN' 28

V. A. KNIGHT, C. T. SETTLEMIRE, AND G. P. BRIERLEY. Differential Effects of Mercurial Reagents on Mitochondrial Thiol Groups and Mitochondrial Permeability 28

G. D. GIFFORD. Mutation of an Auxothrophic Strain of *Escherichia coli* by High Pressure Oxygen.... 29

F. HARADA, H. J. GROSS, F. KIMURA, S. H. CHANG, S. NISHIMURA, AND U. L. RAJBHANDARY. 2-Methylthio N^6-(Δ^2-Isopentenyl) Adenosine: A Component of *E. coli* Tyrosine Transfer RNA.. 29

P. M. VIGNAIS AND J. NACHBAUR. A Critical Evaluation of the Contamination, by Lysosomes, of Preparations of Outer Membrane of Mitochondria 30

J. NACHBAUR AND P. M. VIGNAIS. Localization of Phospholipase A_2 in Outer Membrane of Mitochondria 31

CLIFFORD J. POLLARD AND BIBHUTI N. SINGH. Early Effects of Gibberellic Acid on Barley Aleurone Layers 32

JACKSON LYNN AND GERALD D. FASMAN. A Fluorescent Probe, Toluidinyl-Naphthalene-Sulfonate, Specific for the β Structure of Poly-L-Lysine 32

NDRO PONTREMOLI, ENRICO GRAZI, AND AUGUSTO ACCORSI. Fructose 1,6-Diphosphatase from Rabbit Liver XI. Relation between the Adenosine 5'-monophosphate Binding and the Allosteric Inhibition 335

Information for Contributors

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

In order to assure rapid and accurate publication, it is essential that manuscripts be prepared according to the instructions given below. Manuscripts which do not conform to these specifications may have to be returned for retyping.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8½ x 11″ high quality paper (the complete manuscript, including space occupied by figures and tables, should be not more than 8 pages long).

Summary: The article must be preceded by a brief summary, typed single-spaced, not to exceed 10 lines in length (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Since articles are reproduced directly from manuscripts, the latter must be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used, and special care should be taken to insure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division, and punctuation.

Manuscripts should be double-spaced, on only one side of the sheet; **references, footnotes, and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6½″ wide by 9½″ long.

Use of Symbols and Abbreviations. Abbreviations except for those in the Commission on Biochemical Nomenclature Document #1 (*Arch. Biochem. Biophys.* **115,** 1-12 (1966)) must be defined, and ambiguous abbreviations such as TCA, or P to signify anything but phosphate, should be avoided. Authors are urged to use chemical formulas, such as CCl_3COOH, wherever possible. If improper abbreviations are used it may be necessary to return manuscripts for retyping, which will delay their publication.

Footnotes should be typed single-spaced, at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. Photographs are acceptable. Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink. Illustrations and tables should be submitted on separate sheets. **Do not attempt to insert the figures, figure legends, or tables into the text.** This will be done by the Publishers.

All drawings should be done in black ink on white paper or tracing cloth; they must be planned for reduction to a width of not more than 5″. Final size of the printed page is 5½ x 8⅜″; figures must be planned to fit these proportions.

Graph paper, if used, should be ruled in blue; grid lines that are to show in the final reproduction should be inked in black. High quality glossy prints are acceptable.

Page Numbers and Headings. Page numbers should be written lightly in blue (not typed) at the bottom of each page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature may be cited by number and listed in numerical order in a single-spaced list placed at the end of the manuscript. Abbreviations of journal titles should be those used in *Chemical Abstracts*.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Reprints

Reprint order forms are sent to the authors immediately upon acceptance of their manuscripts. The price list is included.

Methods in Cancer Research

Edited by **Harris Busch**

Department of Pharmacology
Baylor University College of Medicine
Houston, Texas

This multi-authored volume is the third of a series that presents a comprehensive review of available methods for the analysis of biological, oncogenic, morphological, biochemical and therapeutic phases of cancer research.

Volume 3

CONTENTS:

MOLECULAR BIOLOGY
K. S. Kirby, Deoxyribonucleic Acids and Cancer
N. Burr Furlong, DNA Polymerase
Günther Siebert, Nuclear Enzymes
William J. Steele and **Harris Busch,** RNA: Isolation and Fractionation
Jay S. Roth, Some Observations on the Assay and Properties of Ribonucleases in Normal and Tumor Tissues
Hans J. Grav, Nucleotides and Nucleotide Metabolism
Harris Busch and **Charles M. Mauritzen,** Nuclear Proteins
Sam Sorof and **Emily M. Young,** Soluble Cytoplasmic Macromolecules of Liver and Liver Tumor
SOURCES OF ANTITUMOR AGENTS
L. Lee Bennett, Jr., and **John A. Montgomery,** Design of Anticancer Agents: Problems and Approaches
Norbert Neuss, Marvin Gorman and **Irving S. Johnson,** Natural Products in Cancer Chemotherapy

MICROVASCULAR RESEARCH

AN INTERNATIONAL JOURNAL

Edited by **George P. Fulton**
Boston University

David Shepro
Boston University

Benjamin W. Zweifach
University of California, San Diego

ASSOCIATE EDITORS

EDWARD D. FREIS
Veteran's Administration Hospital Washington, D.C.

Y. C. FUNG
University of California, San Diego

M. MASON GUEST
University of Texas

C. R. HONIG
University of Rochester

JOHN IRWIN
Massachusetts Eye & Ear Infirmary

GUIDO MAJNO
Harvard University, Massachusetts

STEFAN MELLANDER
University of Lund, Sweden

KATASHI MORI
Nagoya City University, Japan

CARLO PIOVELLA
University of Pavia, Italy

EUGENE M. RENKIN
Duke University, North Carolina

JOHANNES A. G. RHODIN
New York Medical College

MICHAEL G. TAYLOR
The University of Sydney, Australia

DAVID WAUGH
Massachusetts Institute of Technology

HAROLD WAYLAND
California Institute of Technology

JOHN B. WEST
Postgraduate Medical School, England

Microvascular Research will publish the results of original research related to the microvascular field and will stress fundamental work. The journal is intended to provide a forum for research within a variety of disciplines such as biochemistry, bioengineering, biomathematics, biophysics, circulatory homeostasis, comparative physiology, neuropharmacology, pathology, rheology, and others.

Volume 1, 1968 (Quarterly) $24.00 / **Personal Subscription $12.00***
(Add $1.20 for postage outside U.S.A.) / *(Add $1.20 for postage outside U.S.A.)*

*Personal subscriptions at a reduced rate are available on orders placed directly with the Publishers certifying that the subscription is paid for by the subscriber for his personal use.

A Volume in the A.E.C. Monograph Series on Radiation Biology and Industrial Hygiene

RADIOISOTOPES IN THE HUMAN BODY

Physical and Biological Aspects

By **F. W. Spiers**
Department of Medical Physics, University of Leeds
General Infirmary, Leeds, Yorkshire, England

Prepared under the direction of the American Institute of Biological Sciences.

Intended for physicists and biologists working in the field of radiation research and protection, and for graduate students entering the field, this book offers a unified presentation of the manner in which radioisotopes become deposited in the human body and of the methods of determining the consequent physical dose to the body tissues. Emphasis is given to the biological aspects of the deposition of radioisotopes in the body and the relation of these aspects to the determination of the dose to body tissues. In addition, a concise description of the properties of radioisotopes is included, followed by chapters on isotope metabolism, dosimetry in soft tissues, the structure of bone, and dosimetry in bone. Special attention is given to dosimetry of alpha and beta emitters in bone, the concept of RBE, the dose to body tissues from natural and man-made sources, and the setting of maximum permissible levels for internally absorbed radioisotopes.

1968, 346 pp., $15.00

Advances in Metabolic Disorders

Edited by **Rachmiel Levine**
New York Medical College
New York, New York

Rolf Luft
Department of Endocrinology and Metabolism
Karolinska Sjukhuset
Stockholm, Sweden

Contents

O. Wieland, Ketogenesis and Its Regulation

Albert E. Renold, Spontaneous Diabetes and/or Obesity in Laboratory Rodents

Leonard L. Madison, Ethanol-Induced Hypoglycemia

Mortimer B. Lipsett, Hormonal Syndromes Associated with Neoplasia

Bruno Lunenfeld, Aliza Eshkol, Vaclav Insler, and **Zaki Kraiem,** Metabolic Disorders of the Ovary

Joseph P. Kriss, The Nature and Significance of the Long-Acting Thyroid Stimulator

Noel R. Rose and **Ernest Witebsky,** Thyroid Autoantibodies in Thyroid Diseases

Clifford W. Gurney, Erythropoietin
